ALL THE STEPS OF MANUFACTURING STARTING FROM MACHINE PARTS AND TOOLING INDUSTRIES

INTERMOLD has been leading Japanese mold industry more than 30 years as only one exhibition to showcase state-of-the-art mold technology in Japan. Nowadays the manufacturing industry is diversified. We need a platform to offer companies with a global competitive advantage can deliver the latest technology and information, and execute active business communication.

INTERMOLD is making an aggressive approach to automotive parts, aircraft parts and electronics industries which work closely with molding industry.

In addition, the show covers Additive manufacturing, Digital transformation and future plastic processing as a special theme to promote a new business matching between exhibitors and visitors.

We believe you can get a lot of business opportunities with this comprehensive business platform which offers contacts to all the steps of manufacturing starting from Machine Parts and Tooling Industries.

“ORIGIN OF MANUFACTURING”

**“The Machine Parts and Tooling Industries that support the development of core industry”
We propose consistent solutions from the latest mold technology to metal stamping technology.**

“Reconfirmed the merit of a REAL show”

- After we got through lots of difficulties caused by COVID-19, people reconfirmed how important the platform is for people to meet and talk about future business, to introduce their sales items or products and to exchange demands.
- Especially, overseas business activities have been stopped for the last few years, so people need any information about trade, investment and purchase. The show will be a good chance to grab a future business.

“Continuous announcement of trade fairs”

Collaboration with exhibitors (exhibitor's own events)

- We will archive exhibition information as useful content and disseminate information before and after the exhibition period, aiming for continuous exhibition effects.
- In order not to make the exhibition as an event only during the show period, we will cooperate with the exhibitor's own events such as private shows, technical seminars or factory tours. Please consult with the secretariat.

“Catch the industry demands”

- The exhibition will be held in April at the beginning of the year and will be positioned as the planning for the annual purchase plan, and will be linked with the subsequent plans to aim for synergistic effects.
- Nagoya, Gifu and Mie are the congested areas of material industries, and the center of automobile industries. Exhibitors can appeal the parts or material technology to Tier 1, 2 and 3 companies. Visitors are not only from these 3 areas but also from the neighboring region. This is the unique point of the show in Nagoya.

BUSINESS SEMINARS/BUSINESS MEETING PROGRAMS

Various business seminars have been arranged in INTERMOLD. We invite foreign participants / associations who are interested in organizing their own business meeting to meet with our exhibitors, including the member of Japan Die and Mold Industry Association and Japan Metal Stamping Association or visitors.
