# Promoting Additive manufacturing and business matching in the manufacturing field.

The additive manufacturing specialized exhibition will be held on May 2026 in Nagoya. The exhibition aims promoting the spread of using 3D-related technologies, the user case of AM (Additive manufacturing) and business matching within Japanese manufacturing field. AM technology is becoming a revolutionary manufacturing method because it offers high design flexibility, well-suited for short lead times and low-volume production, and excels in material utilization efficiency. Many experts, engineers, and key-persons from the manufacturing field attend AM EXPO to learn the latest AM technology. We believe you can get a lot of business opportunities in AM EXPO.

## Greeting from Japan Society of Additive Manufacturing, Organizer

The first AM EXPO was held in Nagoya, 2024, and the second edition was held in Tokyo, 2025. The next show will be held in Nagoya again. With support from exhibitors, AM users, and research organizations, the use of AM in actual manufacturing is growing stronger with each passing event. AM EXPO is changing the role from only collecting information to the real business discussion platform. We hope AM EXPO will help your AM business grow, and look forward to your participation.
