ALL THE STEPS OF MANUFACTURING STARTING FROM MACHINE PARTS AND TOOLING INDUSTRIES

INTERMOLD has been leading Japanese mold industry more than 35 years as only one exhibition to showcase state-of-the-art mold technology in Japan. Nowadays the manufacturing industry is required to transform the production to cope with changes in the business environment like electrification of automobiles, carbon neutral, digital manufacturing, and producing new materials.

We organize special fairs on plastic parts processing, manufacturing DX, AI, and robotics to engage with key sectors such as automotive, aerospace, and electronic components closely tied to the die and mold industry.

In addition, the AM EXPO focused on Additive Manufacturing has been held concurrently with INTERMOLD since 2024, offering solutions for complex shapes, small-lot production, and weight reduction. It will also be co-located with the 2026 Nagoya.

As a specialized trade fair for die and mold, metal pressing, and parts processing, we provide this comprehensive platform which offers contacts to all the steps of manufacturing starting from Machine parts and Tooling industries.

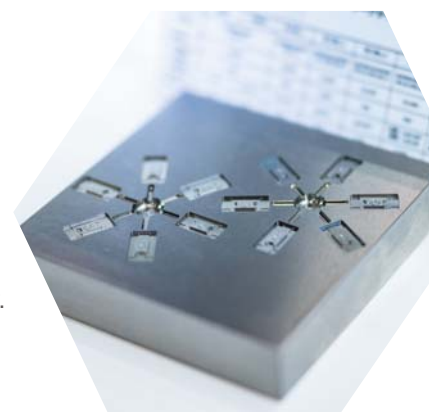

EMPOWERING CHANGE

— TRADITION AND INNOVATION FOR THE GLOBAL STAGE

-The Machine Parts and Tooling Industries that support the development of core industry-
We propose consistent solutions from the latest mold technology to metal stamping technology.

“Why INTERMOLD ?”

1. All process of molding, metal stamping, plastic parts manufacturing are gathered.
2. More than 40 times, it prove that INTERMOLD is the leader exhibition for related industry.
3. The cooperation between organizers and supported associations
4. Promotion of business matching with close industry.
5. Chances to communicating with organizers, visitors, and exhibitors.

“Catch the Industry Demands”

- The exhibition will be held in April and May at the beginning of the year and will be positioned as the planning for the annual purchase plan, and will be linked with the subsequent plans to aim for synergistic effects.
- Aichi, Gifu and Mie Pref. are the congested areas of material industries, and the center of automotive industries. Exhibitors can appeal the parts or material technology to Tier 1, 2 and 3 companies. Visitors are not only from these 3 areas but also from the neighboring region. This is the unique point of the show in Nagoya.
